## Cobble Prep

Cobble Prep is a blend of acids and detergents formulated to clean unsealed paving stones and concrete and prepare for sealing. This highly concentrated blend will remove efflorescence (white lime residue) and surface stains resulting from fertilizer, vegetation, and mortar. Cobble Prep is economical, easy to rinse, and provides a uniform surface for sealer to be applied.

### Directions

Using protective eye and skin wear; mix Cobble Prep in a plastic container. Add Cobble Prep to water (see label for mixing ratios. Always test surfaces first with Cobble Prep in an inconspicuous area for desired results.

On a dry surface, apply the diluted Cobble Prep at the lowest point of the area to be cleaned. For efflorescence cleaning, work on sections of 200 to 250 sqft at a time, applying the cleaner uniformly to all areas with a plastic watering can. For stains and tougher efflorescence a light scrub with a broom may help. Rinse immediately and thoroughly without letting the cleaner dry on the surface! Pressure cleaning to rinse is recommended. Repeat operation only if necessary.

### Dry Times

Do not let the cleaner dry on the surface always rinse thoroughly!!

### Packaging & Unit Shipping Weight

1- gal cans- 4 gal. per case- 40 cases per pallet: 35 lbs per case  
5- gal pails- 36 pails per pallet: 45 lbs per pail

*Use with adequate ventilation.*

*All Reliance Supply Company products are manufactured with the finest raw materials. The shelf life is 12 months from date of purchase when maintained in protected storage of 50F to 90F. It is the applicator's responsibility to determine the appropriate use of the product. All recommendations and suggestions are made without guarantee, since the conditions of use are beyond our control.*

### Characteristics and Technical Data

Appearance	Amber Liquid
Solubility in water	100%
WT./GL.:	8.5lbs
Coverage:	100 to 200 SqFt./Gl. depends on dilution.
